Design Strategist

Design strategist with 13+ years finding the gaps in end-to-end experiences and building the vision and roadmap that get business, operations, and product teams there. Service blueprinting and journey mapping spanning a Fortune 500's 20,000-point global enterprise blueprint, a 27-team journey program across NA, EMEA, and APAC, and a startup's 450-point operating system.

This resume has been scaled down to fit your job posting. To see an extended resume with all of my work context, go to <https://www.hance.work/ext>

WORK EXPERIENCE

AGS CONSULTING

Jan 2024 - Present

Business operations and transformation engagements across service businesses, integrating emerging technology and innovative business models into daily operations, working with franchisees and franchisors across multiple sectors (counseling, fitness, hospitality, film, education, consumer services).

Service Design Lead (Business Operations & Transformation)

- Currently transforming business operations through agentic experience design alongside human and AI skill development, increasing the efficiency and accuracy of leaders, teams, and individual contributors.
- Own transformation engagements from scoping and discovery through implementation and adoption.
- Building AI native, tool agnostic knowledge management systems for creative and operational teams, architected for both human and agent ease of retrieval.
- Created the end-to-end service blueprint for a hospitality franchise to determine the tech stack roadmap for multi-location build outs.
- Built the Franchise Criteria Canvas, a research driven decision tool that gave a nationwide counseling franchise a clear standard for franchisee fit, leading to nationwide restructuring, and a reorganization of teams at the corporate headquarters without a single layoff.

DRYLAND REVIVAL

Jan 2022 - Feb 2025

Designed, built, and facilitated the operating system for a tech forward, full service construction science startup. Directly responsible for 2x revenue and 4x headcount year over year. Ran people operations, hiring, technology integration, playbooks, and performance analytics. Profitable exit via a sale of the business in 2025.

Service Design Lead (Business Operations & Transformation)

- Built a 450 data point enterprise level service blueprint that led to a company wide playbook library that increased efficiency by 80%, both of which became the strategic information architecture for executive level decision making and removed the CEO from being necessary for frontline conversations.
- Crafted an ERAF map of over 100 interaction points that helped siloed employees see their role in context of the more complex business system, increasing buy in surrounding top-level decisions.
- Doubled revenue and quadrupled headcount as second hire and co-founder in three months by redesigning our organizational structure to detach our CEO from daily hands-on work, allowing him to focus on higher leverage efforts in sales, design, and leadership.
- Built and ran the hiring funnel that scaled the team from 3 to 15 in a single season and to 40+ hires across multiple seasons, sourcing marketing, sales, design, and field crew through hundreds of first round interviews and a paid multi-day field test that drove 100% season long retention of employees who completed it.
- Designed the automations and information architecture of our project management system, building it end-to-end in ClickUp before rebuilding in Monday.com for better mobile use by the field team.

Experience, Skills, Education, and Multipliers continue on the next page →

Fortune 500 global life sciences company (~100,000 employees). The Crop Science division is responsible for roughly \$27B in annual sales and ~25,000 employees.

Sr. Design Strategist & Design Thinking Facilitator — Customer and Operations Platforms

UX Lead for the Farmer persona, the division's most important customer, inside Customer Platforms — the division's customer facing digital product organizations. As well as one of two dedicated design strategists for the Operations Platforms across hundreds of cross-functional teams.

- Mapped the Farmer persona inside the global enterprise service blueprint — 20,000+ data points across five countries and hundreds of teams.
 - Led the migration of the global, enterprise level service blueprint from Miro to TheyDo.
- Facilitated a global journey mapping effort across NA, EMEA, and APAC that produced 2,250 journey points across 27 teams.
 - Drove material reductions in environmental toxin risk and increases in workplace safety within two quarters.
- Served as UX Lead for the Farmer experience on the end-to-end customer site rebuild, spanning the pre-auth marketing, product, and agronomy surfaces and the post-auth Grower Portal.
 - Refined backlogs and drove product decisions by aligning hundreds of technical stories, research, user feedback, and business goals to user needs, driving a 35% increase in product and service opportunities across the NA and LATAM builds, leading User Acceptance Testing across the NA user base after shipping changes.
 - Drove the research and strategy that anchored the enterprise Customer Data Platform vendor selection, additionally structuring the CDP governance team composition to enhance user experience and business insights.
- Authored the Universal Design Principles adopted across every platform under the Head of Design for the Crop Sciences organization.
- Facilitated hundreds of design thinking workshops for diverse teams, from 5 to 150 people, maturing design thinking within the company and fostering a culture of user centered innovation.
 - Was selected by Miro as Bayer's single Enterprise Advocate for the company.
- Built out and wrote all stories for a scrum board for a legacy Operations Platform product team that had no user stories or change tracking.

Sr. AI Enablement Strategist (Generative AI) — Global Commercial

Lead strategist for the generative AI and LLM development effort across Global Commercial, the division's organization that oversees the platforms driving the bulk of Crop Science's annual revenue.

- Pioneered an agentic persona service across multiple company-wide platforms, enabling teams to interactively engage with models of users they couldn't otherwise reach (built before commercial AI integrations existed for the company's collaboration stack).
 - Designed the system to produce high fidelity user representations in under 15 minutes validated by SMEs above 80% accuracy, significantly reducing UAT failures and increasing design maturity and user empathy across the organization.
- Authored the company's AI Strategy Playbook and led its global dissemination, materially increasing business stakeholder adoption of the internal AI platform from 2% to 26% in two months.
 - Developed a prompt engineering template that enabled internal stakeholders globally to leverage generative AI for the first time.
 - Reached thousands of internal users across business, engineering, design, and HR in 20+ languages in a single quarter.
- Provided strategic input on the build of the company's internal LLM platform, impacting design and product decisions, and leading user testing.

GREENE FAMILY CAMP

Mar 2014 - Aug 2021

A 1,500-person residential summer camping operation, one of the largest in the country by population and acreage.

Training & Development Lead & Program Director (prev. Special Events Coordinator, Logistics & Purchasing Director, Head Counselor)

- Redesigned a decade old staff in training curriculum and program structure using Self-Determination Theory as the leadership framework, driving a 67% year-over-year staff retention increase.
- Employed experience design principles to innovate on decades old traditions.

DELTA AIR LINES × SCADPRO

Nov 2019 - Mar 2020

Partnered with Delta Air Lines to turn thousands of obsolete beverage carts and cabinets into business models aligned with Delta's sustainability and brand goals.

Innovation Strategist

- Architected a series of prioritization frameworks using matrices, business models, criteria canvases, and other design strategy tools that anchored the team's decision making in client adoption logic.
- Led a cross-cultural team of creatives from eight countries and nine disciplines in developing sustainable business models for the airline.
- Owned end-to-end solution development, from establishing decision criteria through translating insights into actionable business strategies.

CAMPUS CARRIERS

Jan 2017 - Mar 2020

A university logistics startup that handles move-in, move-out, and storage for university dorms and their students.

Service Designer

Designed a leadership development curriculum for students across seven partner universities, combining interactive skill building with competitively paid job experience.

- Pioneered a new revenue line for the company, architecting a multi-stakeholder (B2B2C) service structure spanning parents, students, and universities.
- Owned end-to-end service development, from primary market research with residential life leaders to the educational design of the curriculum through offer design and pre-launch partnership preparations.

Operations Director

Owned operations at the largest location of a regional university logistics startup, running a fleet of 20 trucks, a 100,000 square foot warehouse, and 200+ seasonal staff across six seasons.

- Built the operational playbook that propagated across other partner university campuses, covering recruiting, onboarding, training, scheduling, inventory, and safety, driving a 60% resource reduction by reforming the operational systems and organizational structure.

SAVANNAH BANANAS BASEBALL

2018 season

Was the first hire for the on field entertainment team during the alpha run of what became a globally renowned baseball entertainment and fan experience company.

Experience Designer

- Designed and executed the "Fans First" experiences and promotional campaigns the company standardized and scaled with, developing the prototype experience the Bananas later became internationally known for and servicing the first ever sold out season (250,000 fans).

Operations, People Leadership, and Strategy Roles

Earlier roles span six years of film and television production including **Hamilton Watches**, **Netflix**, **Bravo**, and **VH1**, leadership development and education design, live event and festival operations, and small business operations.

Gallup

SKILLS

Service & Experience Design	Service blueprinting, Journey mapping, Experience design, Design strategy, Solution architecture, UX architecture, Gap identification, Customer experience (CX) strategy
Research & Discovery	User research, Research design, Interview design, Stakeholder interviews, Contextual inquiry, Ethnographic field research, Synthesizing research, Actionable insights, Persona design, AI for research
Methods & Frameworks	Design thinking, Human centered design, Systems thinking, Design sprint facilitation, Lateral thinking, Jobs to be Done framing, Opportunity solution tree, Prototyping, Rapid concept validation, Prototype testing
Strategy & Business Design	Strategic visioning, Roadmapping, Value identification, Business model design, Business case development, Feasibility analysis, Go-to-market planning, Innovation frameworks, Prioritization frameworks, Strategic positioning
Communication & Facilitation	Workshop facilitation, Cross-functional facilitation, Storytelling for business audiences, Strategic narrative writing, Executive communications, Presenting, Workshop design, Advising
People Leadership	Coaching, Mentoring, Talent development, Leadership development, Cross-functional leadership, Influence without authority
AI & Emerging Technology	Generative AI strategy, AI for research, AI augmented design thinking workflows, AI implementation strategy, Prompt engineering, Agentic design, Synthetic users
Tools	Miro, TheyDo, Notion, MAXQDA, DisplayR, QuestionPro, Claude Code, Claude Cowork, agentic AI tools

MULTIPLIERS

- Trained service designer with a business strategy background — this intersection allows me to see business opportunities and gaps most designers and business folk miss.
- Trained in behavior and relationship psychology, as well as people management and influence. Deep empathy for user behavior paired with an ability to influence change without authority.
- System designer and implementer. The strategic roadmap doesn't fall away after handoff, as I can both architect and operationalize.
- Experience across 10+ industries and hundreds of niche personas across unrelated service verticals. Service design and operations strategy skillset transferrable to any business domain.
